

REMARKS

As a result of the outstanding Office Action, claims 1-10 were allowed. The FIGURES were objected to. Claims 7-10 have been canceled. Claims 1-6 continue in the application.

Objection to the Drawing Under 37 C.F.R. 1.83(a)

The FIGURES stand objected to for failing to show, "means for detecting time domain data", "means for converting", "means for filtering", "means for comparing", "means for measuring", and means for resorting", as claimed in claims 7-9. It was said that the FIGURES need to be corrected, or the named elements be removed from the claims.

Applicants believe that there is sufficient support for those means as being embodied in microprocessor 40 and program memory 42 as shown in the flowchart of FIGURES 5 and 6. However, to advance the prosecution of the application, Applicants have canceled claims 7-10.

In view of the foregoing, Applicant submits that grounds for the objection have been overcome, respectfully requests that the objection to the drawing be withdrawn and urges the allowance of claims 1-6.

Respectfully submitted,

Katsuhiro WATANABE, et al.
